**FOR THE FIRST TIME EVER,**

**the world has committed  
to eliminate a cancer.**

**EVERYONE IS INVITED TO JOIN THE LAUNCH**

Since Dr. Tedros' Call to Action in May 2018, the world has responded: in August 2020, the World Health Assembly passed a resolution calling for elimination of cervical cancer and adopting a strategy to make it happen.

On November 17, following the close of the 73rd World Health Assembly, WHO will mark this historic announcement and officially launch the elimination strategy.

Women who have survived cervical cancer from all regions of the world - women who have fought the disease - will open the event. All around the world, companion events and launch activities will mark a day of action.

The moment has arrived for an ambitious, concerted and inclusive strategy to accelerate eliminating cervical cancer as a public health problem.
